

Sears Roebuck & Company

LISTING OF SOURCES BY SOURCE NUMBER

For many products, Sears & Roebuck used the first three numbers of the Model Number (usually followed by a decimal point) to indicate the actual manufacturer of the product. For instance 500.49828 is an engine built by Briggs & Stratton. The following is a partial list of such numbers. Any additions to the list would be appreciated.

- **002** Lemont Industries
- **101** Atlas Press Co.
- **103** Sarlo Power Mower Inc.
- **109** AA Engineering
- **112** Parks Tool Co. (Woodworking equipment)
